Projectors in system integration

Abstract

Projectors are not used as just displaying information for presentation any more. Since they become lighter and brighter than the past, lots of integration research adopt them to produce better results in various field.

In this organized session, the system integration research which is related with projector will be included. They are not only the integrated system of projectors but also the methodology of integrating projectors or techniques to improve the systems which include projectors.

Organizers

Joo-Ho Lee, Ritsumeikan University, Japan.

Joo-Haeng Lee, ETRI, Korea.
